ONE FEATURE YOU CAN SELL

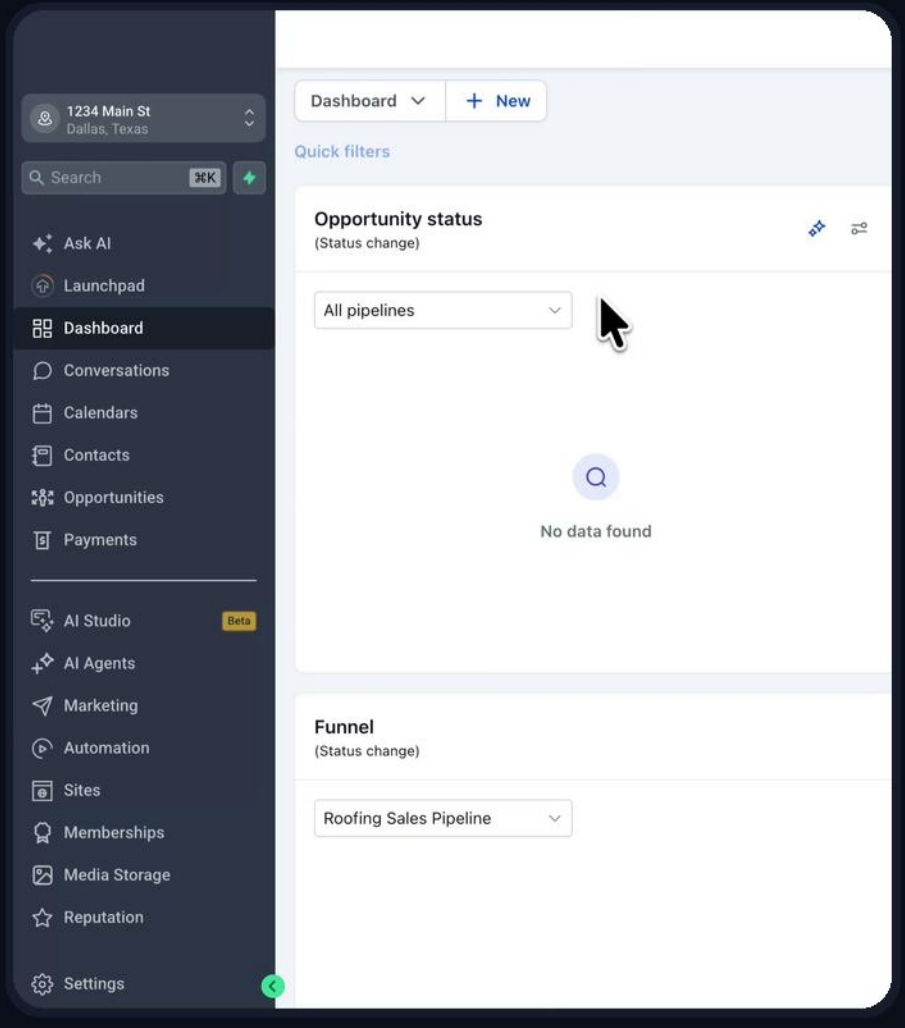

Your clients see too much HighLevel.

The new UI lets you hide the rest. The feature, who pays, and the setup.

BEFORE

Every client sees every tab

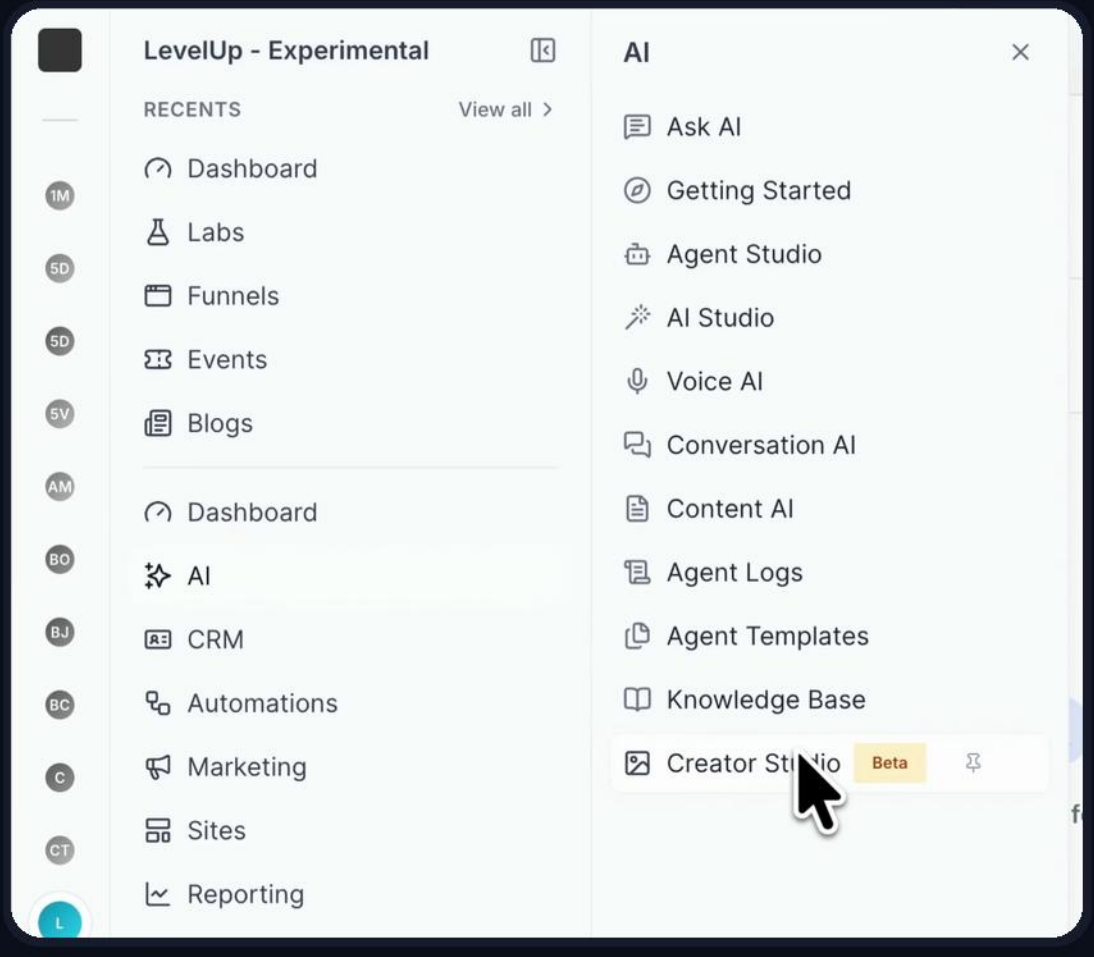

The old left menu: the same long list for everyone.

WHAT CHANGED

AI is now one tab

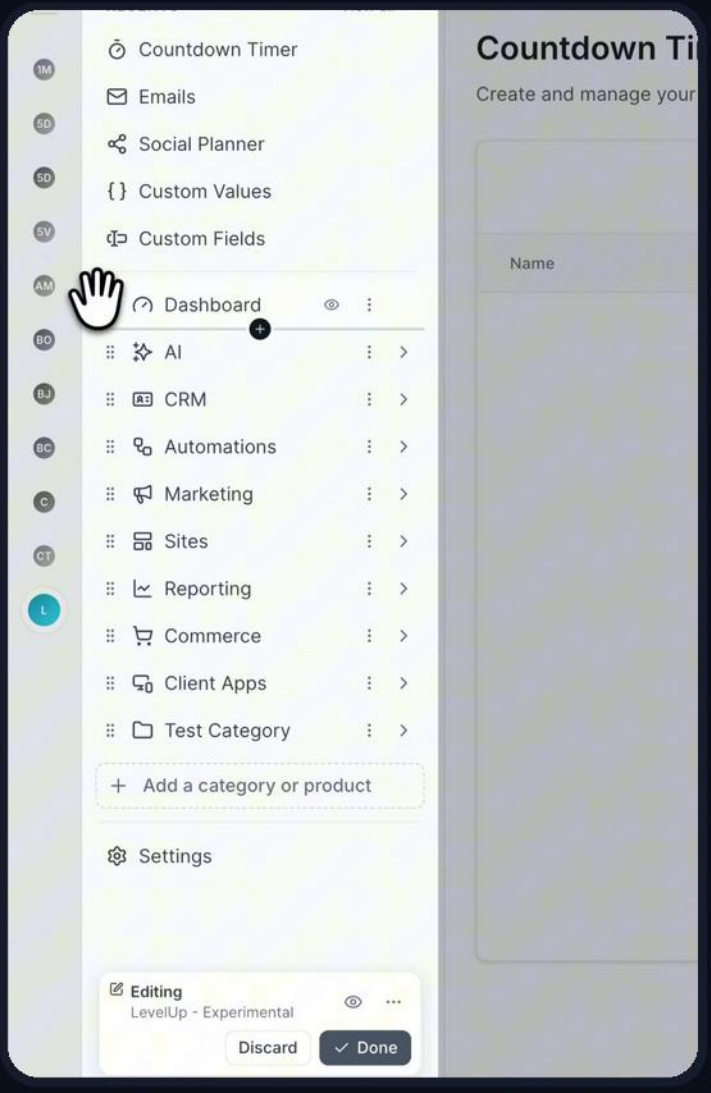

Ask AI, Agent Studio, AI Studio, Voice AI, Content AI, Knowledge Base, Creator Studio: all inside.

STEP 1

Click Edit under the menu

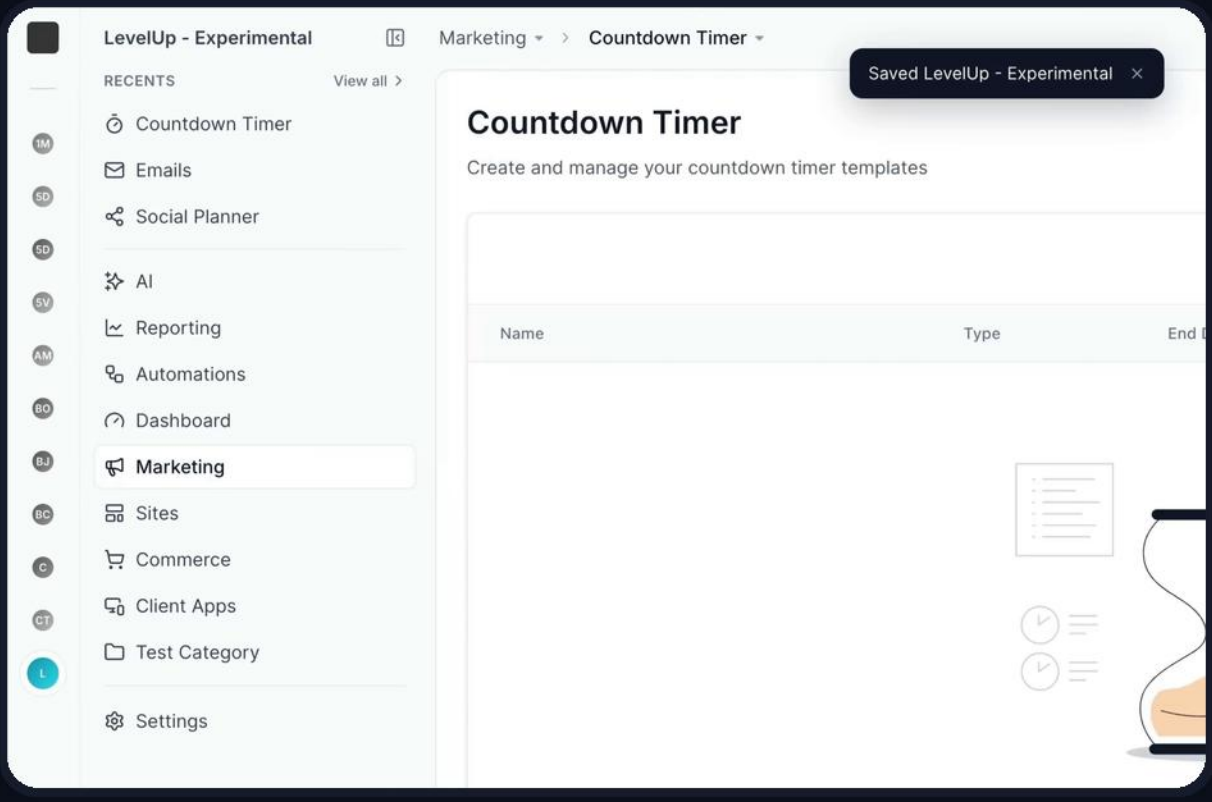

Drag tabs into the order your client needs.

STEP 2

Hide what they don't use

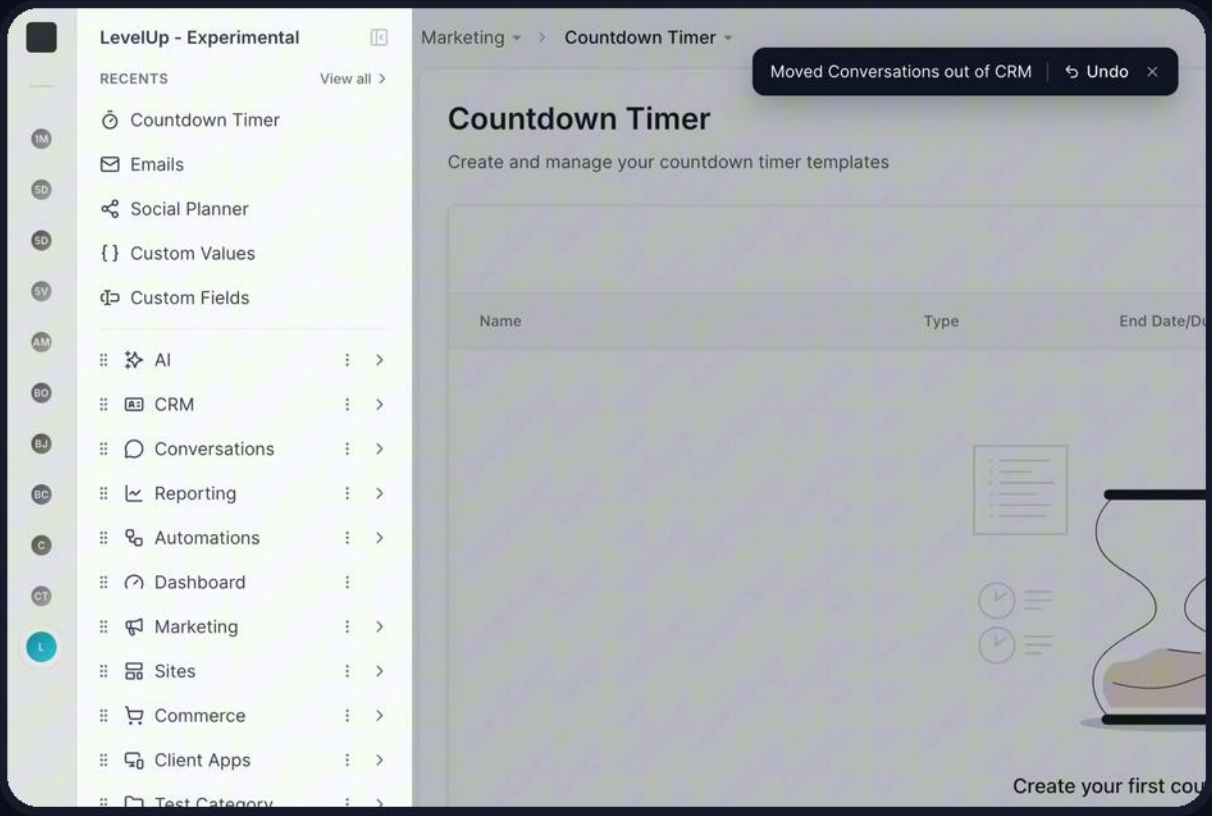

Turn a section off, click Save. It's gone from the layout.

STEP 3

Add quick links

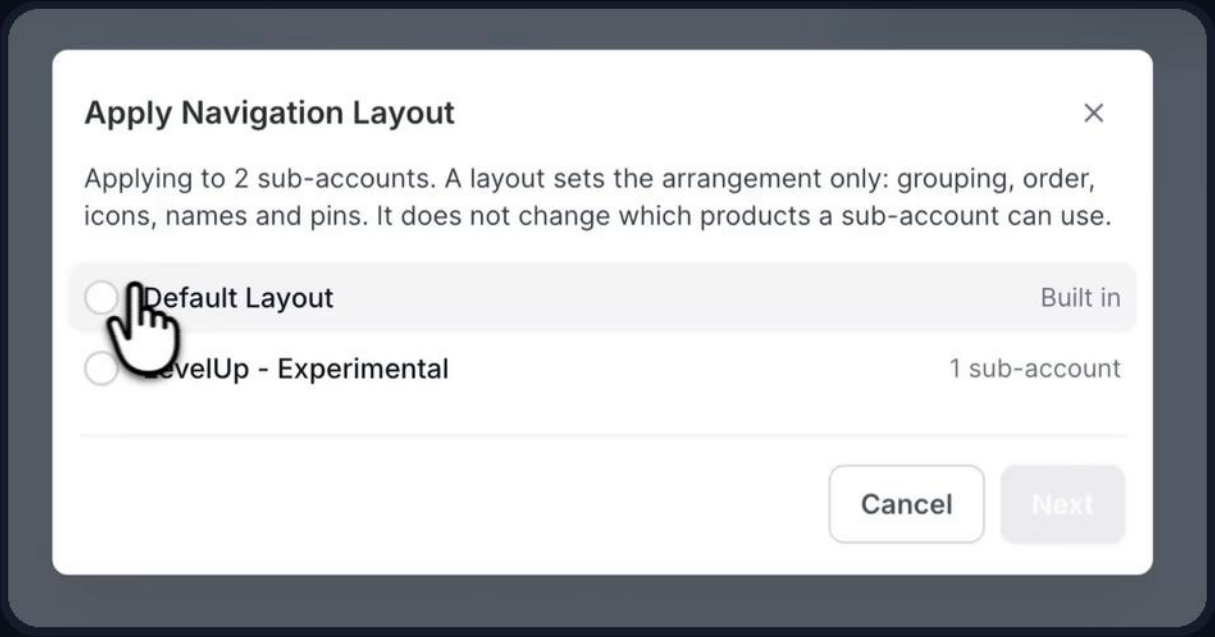

Make Conversations its own one-click item.

STEP 4

Save it. Apply it everywhere.

Layout Selector → pick sub-accounts → Apply.

WHO PAYS

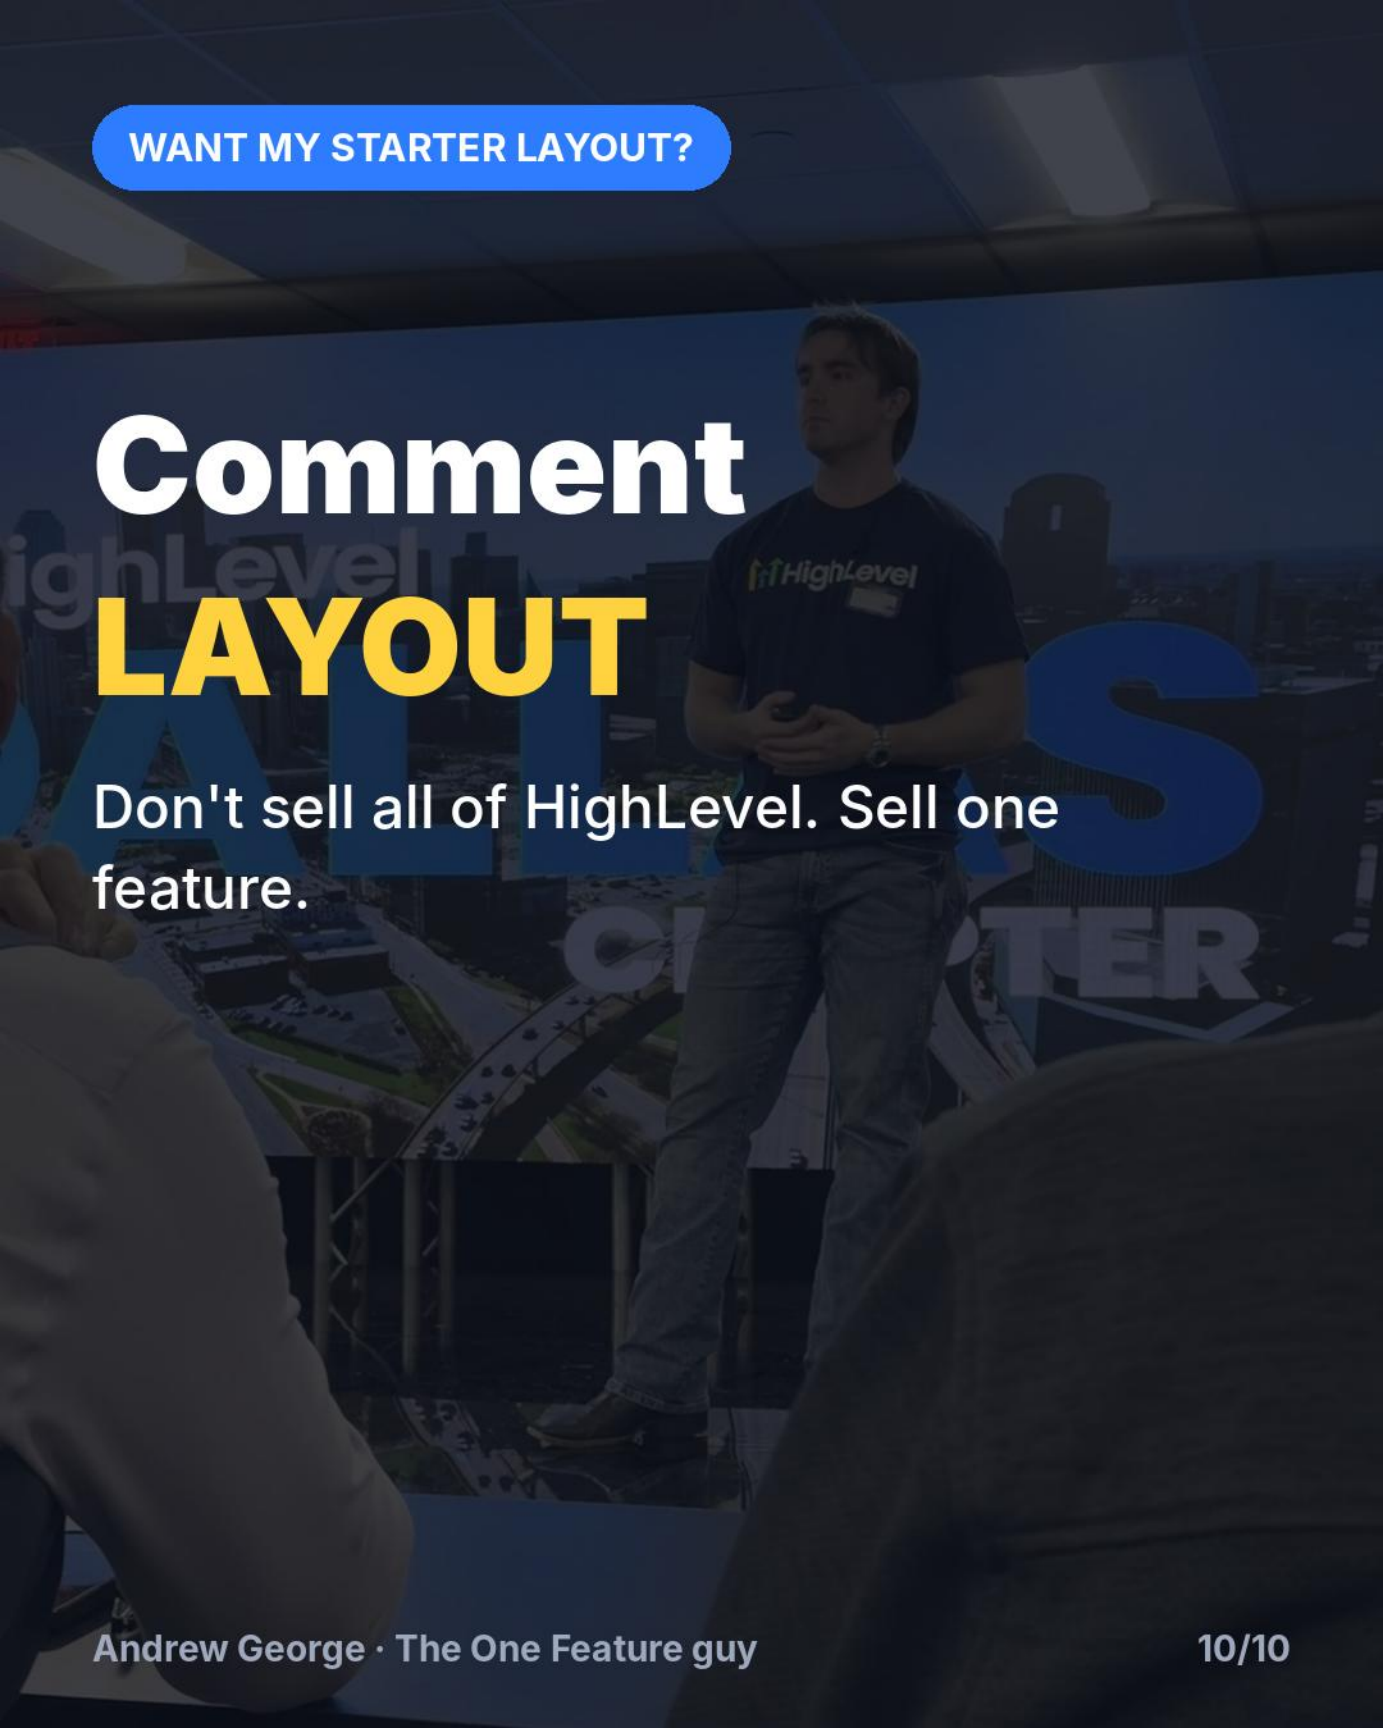

Clients don't leave because it does too little. They get lost.

- Agencies with 10+ clients in one niche
- White-label SaaS builders
- Consultants with client portals

THE OFFER

“HighLevel, built for your industry.”

- One layout per niche
- Onboarding call on just those tabs
- New client? Apply it in one click
